One of advantage of using VISA/Mastercard through LOBSTR to buy XLM is you can buy with many choice of currencies. Not only limited to US Dollar. You can buy using Euro, Pound Sterling, Japanese Yene, Indonesia Rupiah, Thai Baht, Chinese Yuan and many more. This is one of prominent features of Stellar as payment blockchain. Some of them like example below.

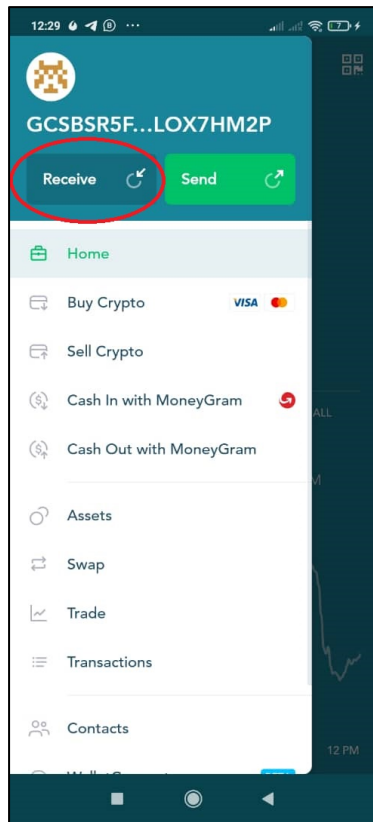

**(Method 2 : Buy & Transfer via Centralized Exchange (CEX) like Kucoin, Binance & etc)**

**We suggest this method for crypto expert or to those who have some knowledges and experiences in crypto trading across platform**

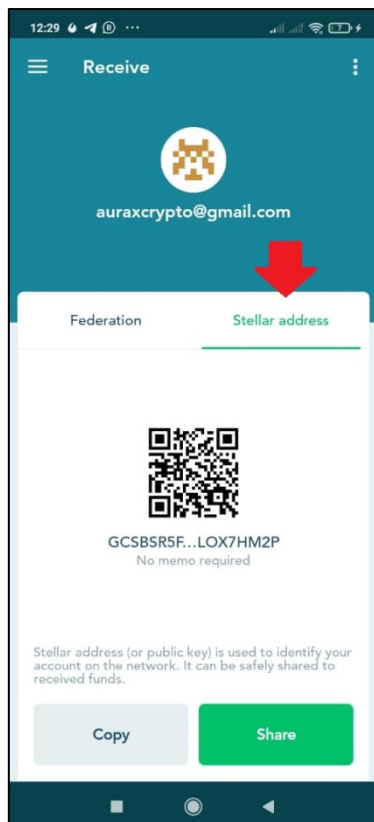

1. Buy XLM with amount you want to buy AURAX. Let say you want to buy \$100 of AURAX. So, you need to buy \$100 of XLM first on other exchanges such as Kucoin, Binance, Huobi, Gate.io or any others exchanges you familiar with. And transfer that amount of XLM into LOBSTR. Example below is the interface of transfer using Kucoin. You need to scan 'Stellar Address' QR code. We shared below the method to get that QR code. No need to put memo as LOBSTR do not required any memo for transaction. Get XLM address by click on scanner in that Exchange.

2. To get 'Stellar Address', open LOBSTR and click on 'Receive' button like below.

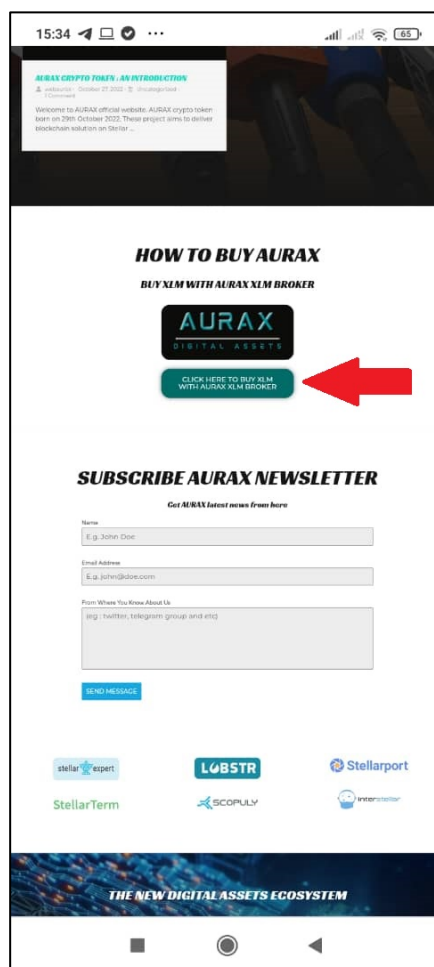

3. Click on 'Stellar Address' and scan that QR Code. You will get XLM address through that and you can transfer XLM from exchange into LOBSTR. Continue the process in exchange and wait for XLM to reach into your LOBSTR.

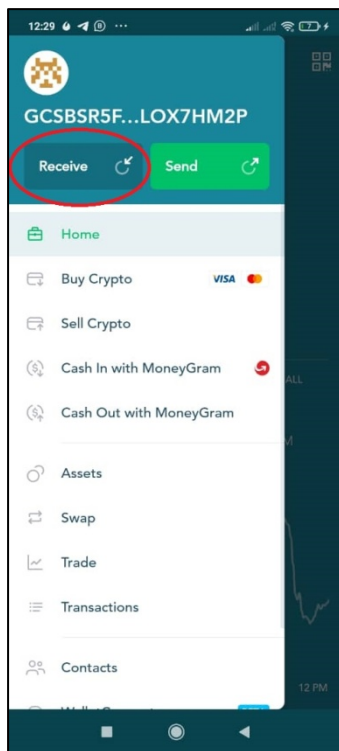

### (Method 3 : Buy via AURAX Broker)

We suggest this method for crypto beginner or to those do not have any experience in crypto trading across platform

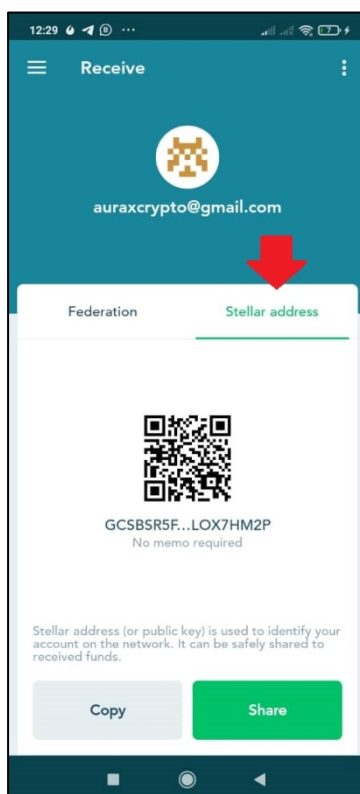

4. Contact AURAX broker through website. Go to [aurax.online](http://aurax.online) and scroll down until you find the button 'Click Here To Buy XLM with AURAX XLM Broker' @ 'Buy XLM with AURAX'. You will be redirected to 'BUY XLM' form. Fill in the form. Amount of XLM you will get depend on amount of money you want to buy AURAX. You will use these amount of XLM to buy AURAX later. Let say, the price of AURAX is equal to 1 XLM. If you want to buy AURAX for \$100, your \$100 will be used to buy XLM first at market price. Let say at that moment, XLM market price is equal to \$0.1. So with \$100 you will get 1000 XLM. With 1000 XLM, at AURAX equal to 1 XLM, means at the end you will get 1000 AURAX. But, remember, if you are LOBSTR first time user, you will get less than 1000 AURAX as LOBSTR required a little amount of XLM to activate it. So, maybe you will get less than 1000 AURAX as you need certain reserve XLM to process your transactions & activate the wallet.

5. You will need to attach your 'Stellar Address' before submitting the form. To get 'Stellar Address', you need to click 'Receive' button like below.

6. Click on 'Stellar Address' and take a screenshot on that QR Code. Attach this screenshot of QR Code into the form and click 'Submit'.
